

Whitworth Marine Services is a mobile marine engineering service.

Nobby Peers Marine Engineer.

Nobby Peers has been fixing things since he was given his first slightly broken toy as a child. Nobby holds a degree in environmental science, with a certificate in agricultural engineering. Nobby Peers brings to you more than 10 years of onshore and off-shore marine experience.

He is equally at home in a 1920s tugboat or a 21st century engine room. In addition to ships, Nobby has been involved in restoring many examples of earlier industrial technologies such as steam locomotives and water-powered mills.

Nobby Peers creates solutions for the tasks at hand.

"We couldn't be happier with the electrical system that Nobby designed and installed for us aboard the Wanderbird. All of our work in the restoration of our North Sea Trawler was carried out in a first class manner and Nobby's was no exception. We do almost all of our work ourselves but when it comes to our electrical system...Nobby is our man!"

Captains Rick and Karen Miles, *SV Wanderbird*

"Nobby analyzed the existing systems and drew up working plans and detailed instructions for the ships crew to follow. He then oversaw the complete rebuilding of the electrical, pumping and hydraulic systems. His knowledge of engine rooms and sources for equipment have been invaluable allowing considerable savings during our refit."

Captain Brad Ives, *SV Kwai*

"The Highlander Sea's engineering systems are like most other sail training vessels, the result of well meaning evolution. Nobby Peers brought considerable experience and an understanding of the traditional sailing dynamic to bear in the redesigning of our systems. I believe he has done great service to the short and long term life of this vessel."

Captain Micah Allnutt,
SV Highlander Sea

MEETING THE MODERN
NEEDS OF TRADITIONAL
VESSELS

Whitworth Marine Services: Design, Installation, Troubleshooting & Repair

- Diesel Engines
- Fuel Systems
- Pumps & Piping
- Watermakers
- AC/DC Electrics
- Battery Systems
- Chargers
- Inverters
- Sewage systems
- Refrigeration

CONSULTING

Whitworth Marine offers consultations in person, on the phone or by e-mail. Chief Engineer Nobby Peers' experience includes complete engine room rebuilds, troubleshooting/repairing machinery and systems as well as brand new installations. From his years of experience on ASTA and other commercial vessels, Nobby brings you the breadth of knowledge to provide practical solutions for all your engineering needs.

"Nobby was an integral part of the Picton Castle's original conversion. He solved problems daily and once at sea was always extremely resourceful. When working with Nobby I always know that he is working in the ship's best interests both short term and long term. Nobby is dedicated to the best solution for machinery issues as they serve the ship. I have no hesitation in recommending Nobby to any vessel or organization that depends on their engine to carry out their mission."

Captain Daniel D Moreland, *SV Picton Castle*

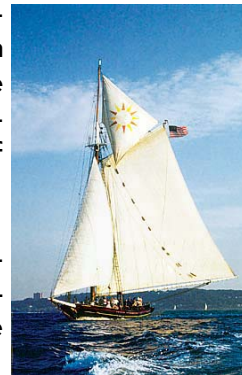

CLASSIC MACHINERY

Whitworth Marine is well versed in the restoration, operation and maintenance of older engines and machinery. Whitworth Marine has an extensive contact network to acquire or fabricate parts.

DESIGN

Every vessel has different engineering needs. What works best for a blue water cargo ship might not work for an educational boat that sails on the Hudson River. Each system designed by Whitworth Marine carefully considers the daily routine, crew requirements and financial concerns of the vessel.

Whitworth Marine will incorporate the various regulations applicable to your vessel into the engineering designs.

EQUIPMENT SALES

Whitworth Marine can supply your ship with much of the high quality equipment you require. Even if we don't install the equipment you purchase, Whitworth Marine can provide the advice you need to make sure you're buying the proper supplies and equipment for your needs at a fair and reasonable price.

- Generators
- Batteries
- Battery Chargers
- Inverters
- DC Switches, Panels and Fuse Gear
- Alternators and Regulators
- Pumps, Valves and Piping
- Watermakers
- Refrigeration
